

SmartView Driver Behaviour Impact Platform

Finally, an easy way to compare policyholder risk and measure the impact driver behaviour has on claims and Scope 3 emissions.

Compare policyholder risk

SmartView is powered by our unique telematics data aggregation tool, SmartLink, which ingests the data from your policyholder's existing telematics hardware to illustrate the impact the behaviour of their drivers is having on everything from claims costs to fleet emissions.

View the impact of poor driving on claims

Speeding, harsh braking and quick acceleration all impact a driver's likelihood of being involved in a collision. SmartView offers you a comprehensive overview, at policyholder level, of how the behaviour of your fleets on cover is impacting claims costs.

Automate Scope 3 fleet emissions reporting

SmartView gives you an automatic baseline of emissions based on your current book, as well as the perfect tool to measure the impact of your efforts to reduce these figures.

SmartLink Award Winning Driver Risk Aggregation

Make better fleet underwriting decisions with telematics data from 60+ hardware providers.

Driver safety, without the carbon footprint

- ✓ Pull telematics data via API from 60+ TSPs & OEMs
- ✓ Prevent 9kg CO2e per connected device
- ✓ Score driver risk in the same way across all fleets
- ✓ Get an immediate view of historic driver risk
- ✓ Identify high risk fleets currently on cover
- ✓ Offer Usage-Based and Pay-How-You-Drive schemes
- ✓ Measure the impact of your risk management strategies
- ✓ Automate pricing decisions
